

# Grace Marie Delgado Navarro

Assistant Consultant

I started working as assistant consultant and hold a master's degree in Planning with a concentration in Economic and Community from University of Puerto Rico and a bachelor's degree on International Business from the same university. I began the career in planning by participating in the process of the creation of an environmental risk mitigation plan doing data collection and analysis through ArcGIS Pro. As well have participated in the planning process for the creation of a linear park within the city of San Juan, Puerto Rico.

Since joining Steer in 2022 I have work in the planning process for projects with short and long range, this background has given me the opportunity to support the team in the data collection & analysis and by writing technical report.

## Relevant skills

**Data Collection & Analysis:** Grace has experience working with data collection and analysis by checking various references to understand the situation and proceed with the analysis to visualize future improvements that the client should implement.

**Writing Technical Report:** She has the expertise of doing reports with a structure that readers can understand the informational that are mostly technical. As well, have the ability to multitask by doing more than one technical report simultaneously.
